

# AMAN GAUR

Software Engineer (Backend / Full Stack)

Bangalore | 6394598034 | gauraman411@gmail.com | [GitHub](#) | [LeetCode](#)

## SUMMARY

Software Engineer with hands-on experience building backend and full-stack applications using **Java, Spring Boot, SQL, Redis, and React.js**. Strong foundation in **Data Structures & Algorithms, OOP, LLD, concurrency, database design, and scalable system architecture**. Experienced in developing REST APIs, optimizing application performance, implementing caching and rate limiting, and deploying applications on **AWS/Linux** environments.

## PROJECTS

### Distributed Inventory & Order System

- Built a **high-throughput order processing system** supporting concurrent requests.
- Improved API response time by up to **90% using Redis caching**.
- Developed **pagination and filtering APIs** for handling large datasets.
- Implemented a **Redis-based distributed rate limiter using the Token Bucket algorithm** to handle traffic spikes.
- Maintained transactional consistency using **database transactions and optimistic locking**.
- Applied **OOP, LLD, concurrency, caching, and database design** principles throughout the application.

### E-Commerce Platform — Full Stack

- Developed secure **REST APIs using Java and Spring Boot** for product and order management.
- Implemented **JWT-based authentication and Role-Based Access Control (RBAC)**.
- Built product **search, filtering, and pagination** functionality.
- Improved database performance by **30% through indexing and query optimization**.
- Developed the frontend using **React and Redux** for state management.
- Deployed the application on **AWS EC2 in a Linux environment**.

## CERTIFICATIONS

### Java Full Stack Development Program | QSpiders | Jan 2025 – Jul 2025

- Hands-on training in **Spring Boot, Spring Data JPA, Hibernate, REST APIs, SQL, and modern Java development**.
- Worked on **API development, database persistence, entity relationships, authentication, and full-stack application integration**.

### Java with Project Development | Sofcon Training | Aug 2023 – Oct 2023

- Strengthened **Core Java, OOP, Collections, Exception Handling, Java 8 features, and problem-solving fundamentals**.
- Applied Java concepts through **project development, JDBC-based database operations, debugging, and modular application design**.

## TECHNICAL SKILLS

**Languages:** Java, SQL

**Backend:** Spring Boot, Spring Data JPA, Spring Security, Spring AOP, REST APIs

**Frontend:** React JS, Redux

**Databases:** PostgreSQL, MySQL, Redis

**Core Concepts:** Data Structures & Algorithms, OOP, LLD, Concurrency, DB Design, Transaction Management, Scalable Architecture

**Cloud & DevOps:** AWS EC2, Linux, CI/CD Basics

**Tools:** Git, Maven, Postman

## EDUCATION

### Master of Computer Applications (MCA)

Greater Noida Institute of Technology | 2022 – 2025

### Bachelor of Computer Applications (BCA)

Galgotias University | 2019 – 2022

**College Learnings:** Java Programming, OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Web Development, Software Development, and Database Management.
